

STSS1000A FOR ROSCO BACKUP CAMERA SYSTEMS

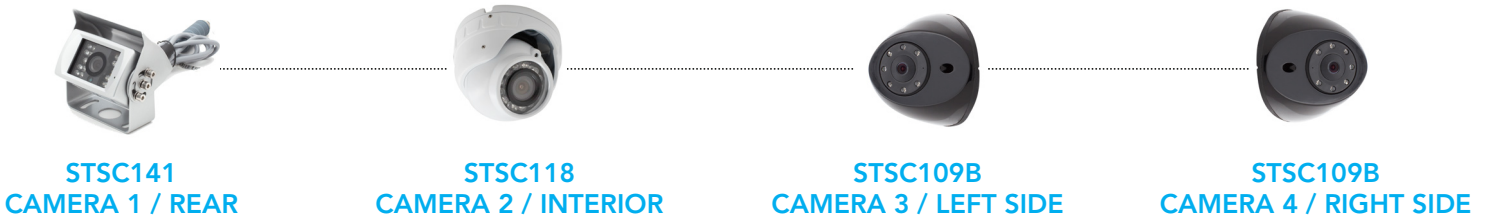

SPLITTER BOX

With the STSS1000A Splitter Box, a one camera input monitor can be converted to a four camera monitor. The splitter box allows up to three more screen views but also gives the option for dual or tri-screen views for

extra flexibility. All camera inputs can be triggered individually and automatically. The driver can select system on, or any specific channel at any time. Equip your drivers today with multi camera views to enhance safety within your fleet.
